Subject: NAS Review of the Use of Science and Adaptive Management in California's Draft Bay Delta Conservation Plan

Greetings.

Trust this National Academy of Sciences (NAS) report published today (kindly brought to my attention by Mr. Keith Coolidge) is of some interest. The criticism there-in is worth discussing amongst SCWC colleagues. I plan to review the report with great interest.

NAS also published a report recently which was critical of Chesapeake Bay Recovery program.

Please share.

Thanks and regards.

Kiran 05/05/11
